

AI Usage DISCLOSURE FORM

1. Team Details

Team Name: Delusion

Project / Product Name: Claw Sentinel

Organization / Institution (if any): MSRIT

Submission Date: 08-05-2026

2. AI Usage Declaration

Did your team use any Artificial Intelligence (AI) in developing this project? Yes / No

Yes

3. Purpose of AI Usage (Brief Details)

Idea generation / brainstorming :We researched on feature planning,workflow ideation and architecture refinement

Code generation or assistance:Assisted in ML pipeline structuring, anomaly detection logic, and streaming AI integration

UI / UX design:Generated dashboard concepts, architecture diagrams, and presentation visuals

Content creation:Helped draft pitch content, feature explanations, and documentation

Data analysis:Assisted in anomaly score interpretation and threshold calibration

Testing / debugging:Used ML models (Isolation Forest) for anomaly detection and behavioral analysis

4. Feature Origin Classification (Please add/delete based on the number of the feature)

1. Feature Name:OpenClaw Contextual Reasoning System

2. Self-Generated/AI-Generated/Both:OpenClaw Contextual Reasoning System

3. Description (include AI tools/platform Used, prompt used , Output Summary, Modification) :Used OpenClaw agent framework with LLM-based contextual reasoning to analyze suspicious events using household history and behavioral context. AI tools assisted with architecture planning, agent workflow structuring, and reasoning prompt refinement. Final orchestration logic and integration flow were designed and customized by the team.

1. Feature Name:Telegram Interactive Alert System

2. Self-Generated/AI-Generated/Both :Self-Generated

3. Description (include AI tools/platform Used, prompt used , Output Summary, Modification) :Built an interactive Telegram alert system enabling two-way communication and real-time action handling. AI tools were used for UI/UX refinement, bot interaction ideas, and workflow optimization. Final implementation and customization were completed by the team.

1.Feature Name:SmartThings Integration Architecture

2. Self-Generated/AI-Generated/Both :Both

3.Description:Designed integration workflow between SmartThings APIs, OpenClaw agents, and local AI processing pipeline for contextual smart-home security automation.

5. Ethical & Compliance Confirmation

AI usage complies with guidelines and policies. **Yes**

No proprietary or copyrighted data misused. **I Agree**

6. Declaration & Sign-Off

Name of Team Representative:Sreeya Chand

Role:Leader

Signature:SC

Date:8-5-2026
